

## **ANNOUNCING QUANTUM DICE'S LATEST FUNDRAISING**

**Afrimobility participates in Quantum Dice to drive innovation in quantum technology**

We are excited to announce that UK-based Quantum Dice, an innovative leader in quantum technology and photonics, has raised funds in its latest funding round. Afrimobility is proud to be a part of this round, contributing to their groundbreaking work.

Quantum Dice, founded by Ramy Shelbaya and backed by world-class research from the University of Oxford, specializes in quantum random number generators (QRNGs), which are critical for secure cryptographic communications. Their flagship product significantly improves the security of network systems and commercial applications, providing a robust defense against cyber threats.

This round also includes contributions from other key investors, as well as UK-based state and private entities.

As the first Moroccan VC to invest in quantum technologies, we are proud to support Quantum Dice in their mission to drive advancements in deeptech and contribute to the future of secure digital transactions.

This funding will enable the company to accelerate its growth and expand its global reach, bringing innovative solutions to the forefront of the cybersecurity landscape.

Onwards and upwards, Quantum Dice !
